Proposal **VS-2026-01**
8 November 2026
Valid until 8 December 2026

Thermal analysis — 12 MW rooftop array

Prepared for [Client Name] · [Contact, Role]

WHAT YOU ASKED FOR

> You have a 12 MW rooftop array near Chakan and a thermal survey flown in October that has not been analysed. You want to know which modules are underperforming before the maintenance window in January.

WHAT WE WILL DO

1. Ingest and quality-check the supplied survey, and confirm the capture supports module-level analysis
2. Radiometric analysis across all frames
3. Defect detection and classification by severity — hotspots, bypass diode failures, string faults
4. Engineer review of every finding before it reaches you
5. Module-level defect map keyed to your plant layout
6. Report and a walkthrough call with your engineering team

WHAT YOU RECEIVE

- Module-level defect map, keyed to layout
- Ranked defect list — location, type, severity, recommended action
- Annotated thermal frames for every flagged module
- Summary report, PDF
- Processed outputs — orthomosaic GeoTIFF
- One walkthrough call

WHAT WE NEED FROM YOU

- The October survey imagery, with flight logs if available
- Plant layout or string diagram
- A named technical contact for questions during analysis

TIMELINE

Data received	day 0
Draft findings	day 5
Review call	day 7
Final delivery	day 10

VAAYUSIGHTS
THE INTELLIGENT EYE FROM ABOVE

COMMERCIAL

Thermal analysis, 12 MW — defect map, ranked list, report	INR [amount]
Optional: repeat survey analysis, per quarter	INR [amount]
Total, this engagement	**INR [amount]**

Plus GST where applicable. 50% to begin, 50% on delivery, net 15 days.

ASSUMPTIONS AND EXCLUSIONS

- Pricing assumes the supplied imagery meets a standard radiometric capture specification. If it does not support module-level analysis, we will say so before starting and quote a re-fly separately.
- Excludes physical repair, electrical testing and certification.
- Excludes travel outside Maharashtra.
- Deliverables in English.

CONFIDENTIALITY AND OWNERSHIP

Your data remains yours. We process it for this engagement only, do not share it, and will delete or return it on request after delivery. Deliverables become your property on final payment.

We would like to reference this work as an anonymised case study — no client name, no location, no identifying detail. Tick to decline: ☐
